

This heatmap visualizes the relationship between 20 Topics (rows, 0-19) and 99 Query Subsets (columns, 0-98). The color scale represents a value ranging from 2.0 (dark purple) to 5.5 (light orange). The heatmap shows varying degrees of association, with some topics showing high values (light orange) across many query subsets and others showing lower values (dark purple) for specific subsets.
